PROFESSIONAL SUMMARY

Software Engineering fresh graduate with hands-on experience in web, mobile, and IoT development through internship and academic projects. Experienced in building web applications, Android applications, and ESP32-based IoT systems. Currently strengthening Python programming skills while exploring artificial intelligence and machine learning.

EDUCATION

SMKS MAHARDHIKA BATUJAJAR – *Bandung Barat, Jawa Barat* 2023 – 2026
Vocational High School – Software Engineering

TECHNICAL SKILLS

Programming Languages

- Python
- PHP
- JavaScript
- Kotlin

Web Development

- HTML
- CSS
- Bootstrap

Database & Backend Services

- Supabase

Tools & Platforms

- Git
- GitHub
- Android Studio

IoT

- ESP32
- Arduino Uno
- Blynk

WORK EXPERIENCE

BBPPMPV BMTI - *Cimahi, Jawa Barat*

July – November 2025

INTERN – SOFTWARE DEVELOPMENT

Completed a 4-month internship contributing to software development projects involving web applications, Android mobile apps, and IoT systems at a national vocational education center.

- Developed a web application using PHP and Bootstrap, supporting the center's internal digital workflow needs.
- Built an Android mobile application using Kotlin and Android Studio with a functional and user-friendly interface.
- Designed and implemented an IoT smart lighting system using ESP32 microcontroller and the Blynk platform, enabling remote on/off control via a mobile app.

PROJECTS

MyParkirGua - *Smart Parking IoT System*

2025 – 2026

Developed a full-stack Smart Parking Management System integrating web technologies and IoT devices for real-time parking monitoring and vehicle tracking.

- Built the system using Vanilla Javascript with Backend as a service using Supabase, implementing real-time parking, vehicle entry/exit tracking, and automated reporting features.
- Designed a normalized relational database schema to efficiently manage parking slot status, transaction history, and vehicle records.
- Implemented a data-driven dashboard displaying parking occupancy statistics, providing insights that support future integration with AI-based parking prediction models.

LANGUAGES AND INTERESTS

Languages:

- Indonesian (Native)
- English (Intermediate)

Interests:

- Artificial Intelligence & Machine Learning
- Python Programming
- IoT Systems
- Web Development
- Mobile Development.
