PROFESSIONAL SUMMARY

Software Engineering fresh graduate (June 2026) with hands-on experience in web, mobile, and IoT development through a 4-month internship and academic projects. Experienced in building web applications, Android applications, and ESP32-based IoT systems. Currently strengthening Python programming skills while exploring artificial intelligence and machine learning.

EDUCATION

SMKS Mahardhika Batujajar – Bandung Barat, Jawa Barat

2023 – 2026

Vocational High School – Software Engineering — Graduated, June 2026

WORK EXPERIENCE

Intern – Software Development

July – November 2025

BBPPMPV BMTI – Cimahi, Jawa Barat

Completed a 4-month internship contributing to software development projects involving web applications, Android mobile apps, and IoT systems at a national vocational education center.

- Developed a web application using PHP and Bootstrap, supporting the center's internal digital workflow needs.
- Built an Android mobile application using Kotlin and Android Studio with a functional, user-friendly interface.
- Designed and implemented an IoT smart lighting system using an ESP32 microcontroller and the Blynk platform, enabling remote on/off control via a mobile app.

PROJECTS

MyParkirGua – Smart Parking IoT System

2025 – 2026

Developed a full-stack smart parking management system integrating web technologies and IoT devices for real-time parking monitoring and vehicle tracking.

- Built the system using vanilla JavaScript with Supabase as backend-as-a-service, implementing real-time parking slot detection, vehicle entry/exit tracking, and automated reporting features.
- Designed a normalized relational database schema to efficiently manage parking slot status, transaction history, and vehicle records.
- Implemented a data-driven dashboard displaying parking occupancy statistics, providing a foundation for future AI-based parking prediction models.

TECHNICAL SKILLS

Programming

- Python (basic)
- PHP (basic)
- JavaScript (basic)
- Kotlin

Web Development

- HTML
- CSS
- Bootstrap

Database & Backend

- Supabase

Tools & Platforms

- Git
- GitHub
- Android Studio

IoT

- ESP32
- Arduino Uno
- Blynk

Office

- Microsoft Word
- Microsoft Excel

LANGUAGES & INTERESTS

Languages

- Indonesian — Native
- English — Intermediate

Interests

- Artificial Intelligence & Machine Learning

- Python Programming
- IoT & Web/Mobile Development
